### Description:

Fine example of Braun & Hogenberg's map of Swiebodzin.

The earliest historical records mentioning Swiebodzin dates to the beginning of the fourteenth century.

The town grew around the confluence of old trade routes linking Silesia with Pomerania and a branch of the route running from Lusatia to Wielkopolska. In the beginning, the town was probably a defensive fortification, built on the western banks of Lake Zamecko at a slight elevation.

The town wall was ringed by settlements, which were much later incorporated into the city itself.
