Description:

Nice example of Seutter's map of America, with two spectacular full color cartouches. A highly detailed and richly engraved map. Seutter's maps are among the most The map is packed with geographic detail, real and apocryphal. The Great Lakes are very unusually shaped. A number of mythical western places are shown. South America is much too wide. The Mississippi is considerably west of its proper course. Many other interesting features. A fine dark impression. Curious red lines along several folds, something we have seen on this particular map on several occasions in the past. McLaughlin 211.
