### Description:

Rare German edition of De L'Isles' map of North America, with two striking decorative vignettes on the left side, showing scenes from Mexico. The map shows a peninsular California, excellent contemporary treatment of the Mississippi River and the Southwestern US, updated Great Lakes and dozens of early placenames and Indian Tribes. Quivera has now been moved to the Upper Plains, just above the Missouri River, which is not named. Nice wide margins and attractive color. Only the third example we have seen in 15 years.
