Description:

Decorative old color example of Coven's & Mortier's edition De L'Isle's maps of the northern part of South America.

The map Colombia, Venezuela, Peru, Ecuador, Brazil, Guiana and parts of Bolivia, Chile, Paraguay and Argentina.

De L'Isle was known for his fine scientific mapping style, restricting the cartographic content of his maps to what he deemed to be reliable reports and eliminating speculative information. Through a meticulous process of comparing the reports from multiple sources, he was able to reconcile diverse data to create the best maps of the period.

The detail in the Amazon River and its tributaries is quite advanced for the period, as is the treatment of the Andes mountains.
