Erythraei Sive Rubri Maris Periplus, olim ab Arriano descriptus, nunc vero ab Abrah. Orelia ex eodem delineatus

Stock#: 83516
Map Maker: Ortelius
Date: 1584
Place: Antwerp
Color: Hand Colored
Condition: VG+
Size: 18.5 x 14 inches
Price: \$ 1,200.00

Description:

Fine Ortelius Map of the Indian Ocean Linking Mythical, Ancient, and Contemporary Exploration. Separately Published Example.

Striking historical map of the Indian Ocean and contiguous regions of the Middle East, India and Southeast Asia, published by Ortelius in his *Parergon*. This map was created based on the *Periplus Maris Erythraei*, whose author is unknown. It directly links explorers contemporary to Ortelius to ancient and famed voyagers such as King Hanno of Carthage and Odysseus from Homer's *Odyssey*.

Oriented northward, this ornate map shows regions around the Indian Ocean (*Erythraeum Sive Rubrum Mare*). The map stretches from Egypt (*Aegyptus*) and the eastern coast of Africa (*Barbaria* and *Azania*) across the Arabian Peninsula (*Arabia Eudaemon*), India (*Mambari regnum*), and to Southeast Asia (*Aurea Regio*). The Equator (*Aequinoctialis circulus*) and the Tropic of Cancer (*Circulus Cancrari*) are notable. There is also an inset map of the north-central Mediterranean.

Africa, the Arabian Peninsula, and India are shown in essentially their modern configurations, while Southeast Asia is a bit more abstract, speaking to the lack of knowledge of this area when Ortelius was making maps. Ortelius based this map off of the writings of Ptolemy, who based his own work on records of Alexander the Great's travels.

The map contains few mountain ranges or rivers, only including those that are large and well-known, such as the Nile (*Nilus*) and the *Ganges* Rivers. This gives the viewer a sense of the geography of the areas

Erythraei Sive Rubri Maris Periplus, olim ab Arriano descriptus, nunc vero ab Abrah. Orelia ex eodem delineatus

without distracting from the cities, inset maps, or text. The water bodies are filled in with basic stippling, but contain a number of small, decorative elements. For example, four sea serpents can be found off the west coast of India. Cities are represented as miniature views, in typical Ortelius style.

The largest cartouche on the map is also an inset map of Greece and southern Italy. It portrays the voyage of Odysseus (Latinized to Ulysses), and the water bodies are decorated with a number of ships, some half sunk. Though not heavily labeled, many of the important locations from Homer's *Odyssey* can be found on this inset map, including *Ithaca*, *Ogygia*, *Scylla* and *Charybdis*, and the island of the *Cyclopes*.

Another large strapwork cartouche contains the map's title. The title indicates that the map represents a sailing voyage along the coasts of the Red Sea and the Indian Ocean recounted in the *Periplus* (a log of coastal ports and landmarks, and this one being the *Periplus Maris Erythraei*) by Arrian.

Two more inset maps adorn the upper corners of the map. One is called *Annonis Periplus*, showing the west coast of Africa as it was traveled by King Hanno from Carthage. He is said to be the first to sail around the African continent to reach the Arabian Sea (interestingly, he is also said to be the first person to tame a lion).

The other small inset map shows the Arctic region, which Ortelius calls *Hyperborei*. This inset is included to increase the aesthetic appeal of the map, and to remind the reader that despite the best efforts of modern explorers, a passage to the Far East via the North Pole had not yet been found by the English or the Dutch. In this way, Ortelius engages with the reader and compares the journeys of Odysseus and King Hanno to contemporary explorers of the 1500s.

Though Ortelius cites Arrian as the author of the *Periplus* in the title, a body of text on the map questions Arrian's authorship. He notes a number of dissimilarities between this *Periplus* of the Erythraean Sea and one that Arrian wrote of the Black Sea, including differences in style and sources.

Parergon

Although best known for his world atlas, the *Theatrum Orbis Terrarum*, the *Parergon* was a project of personal interest and the work that Ortelius himself considered his greatest achievement. He had a deep curiosity about classical antiquity which spurred him to create the *Parergon* maps, and the amount of time and detail he put into each map is clearly evident. Ortelius hand drew each map of the *Parergon*, which required considerable skill and knowledge of the area's history and geography. It is considered the first historical atlas.

**Erythraei Sive Rubri Maris Periplus, olim ab Arriano descriptus, nunc vero ab Abrah.
Orelia ex eodem delineatus**

Parergon means supplementary and, accordingly, the first three *Parergon* maps were published as supplements to the 1579 edition of the *Theatrum*, which had already been in print for nine years. Over time, successive editions of the *Theatrum* were supplemented with more *Parergon* maps, and there are 55 known plates overall. The *Parergon* was also published as its own atlas separate from the *Theatrum* on two occasions, once in 1595 and again in 1624.

The *Parergon* was highly successful both as a supplement to the *Theatrum* and on its own. It was variously translated into French, German, Italian, and English and regularly printed until 1612. Further editions were more sporadic but still popular, such as the 1624 edition which was published twenty-six years after Ortelius' death in 1598.

This map appeared in 1601. After 1612 and before 1624, the plate was touched up, with the major change being a shift from a two-line title into a four-line title. The title remained the same, however. Several new places names were also added.

This beautifully decorated map is an interesting look into Ortelius' thoughts, as he gives his opinion on the author of the *Periplus Maris Erythraei* and the voyages of famous explorers. It intentionally blends history and myth, and it would certainly stand out in a collection of South Asian maps, Ortelius maps, or maps of the ancient world.
