<b>Place:</b>	Basel
<b>Color:</b>	Uncolored
<b>Condition:</b>	VG
<b>Size:</b>	13.5 x 10 inches
<b>Price:</b>	SOLD

An early example of Munster's map of America, first issued in 1540. The earliest map of all of America and the first to name the Pacific Ocean (Mare Pacificum). It is also one of the earliest depictions of Japan. The depiction of North America is dominated by one of the most dramatic geographic misconceptions to be found on early maps-the so-called Sea of Verrazzano. The Pacific cuts deeply into North America so that the part of the coastline at this point is a narrow isthmus between two oceans. This was the result of Verrazzano mistaking the waters to the west of the Outer Banks, the long barrier islands along North Carolina as the Pacific. The division of the New World between Spain and Portugal Spain and Portugal is recognized on the map by the Castille and Leon flag planted in Puerto Rico, here called Sciana. Schwartz/Ehrenberg, pp. 43, 45, 50; Cortazzi, H. *Isles of Gold*, pl. 12; Tooley, R.V. *Maps and Mapmakers*, p. 112, pl. 80; Burden 12, state 5 variant. The first Italian edition of State 5, which can be distinguished from the 1552 example by the text on the verso. A nice example, with two very small worm holes and a bit of discoloration at the fold, but generally a nice example of this hard to find early state of the map.
