Description:

The Second Large Format Map of New Hampshire Printed in America

Nice example of John Reid's map of New Hampshire, the second earliest folio atlas map of New Hampshire printed in America.

The map is drawn largely from the 1795 Matthew Carey map of New Hampshire by Samuel Lewis. An excellent topographical map, showing the counties, boundaries, principal towns, mountains, rivers, islands and many other details.

John Reid's American Atlas was the second folio-sized atlas published in the US. Reid's atlas was originally issued to accompany Winterbotham's *Historical, Geographical, Commercial and Philosophical View of the United States*.
