**A Map of that Part of America where a Degree of Latitude was measured for the Royal  
Society by Cha. Mason & Jere: Dixon**

Following a dispute of nearly 100 years, the Penn and Calvert (Lord Baltimore) families finally settled their dispute over the boundary between the two colonies in the mid 18th Century. Initial attempts to employ local surveyors failed to produce a satisfactory map, which led to the employment of Charles Mason and Jeremiah Dixon, to travel to America to lay down a proper survey. The survey resulted in a two sheet manuscript map, of which this is a reduced version of the Eastern sheet.

The map first appeared in the *Transactions of the Royal Philosophical Society* in early 1769 and was later re-issued in the November 1769 edition of the *Gentlemans Magazine*.

**Detailed Condition:**

Pencil line along the bottom neat line. Signs of repair top right corner.
