Stock#: 11946
Map Maker: Van Keulen
Date: 1728
Place: Amsterdam
Color: Hand Colored
Condition: VG+
Size: 40 x 23.5 inches
Price: SOLD

Description:

Rare late chart of Florida, the Bahamas, Cuba and the Cayman Islands, by Gerard Van Keulen, son of the Johannes Van Keulen, the patriarch of the Van Keulen family of sea chart publishers. With the assistance of Claes Janz Vooght, the family published the Zee-Atlas whose first edition appears in 1680, and later the Nieuwe Groote Lightende Zeefakkel, a monumental 5 volume work which was commenced in 1678 and continuously enlarged and expanded over the next 100 years. This superb, large-scale nautical chart is a landmark in the mapping of the Florida peninsula, Bahamas and Cuba. Southern Florida is shown in tremendous detail and includes dozens of place names, islands and soundings with an excellent depiction of the Keys. The fine detail extends throughout the Bahamas and Cuba and includes three inset plans of Havana, Hondo and Mantancas Bays. Van Keulen based much of his map on English observations and includes two designations of latitude (English and Dutch) which vary by 30 minutes. Gerard Van Keulen was the son of Johannes Van Keulen, patriarch of perhaps the most prolific of all Dutch map making families. The family firm commenced in 1680, but it was Gerard who brought it to its full glory in the 18th century. A talented engraver and mathematician, and later Hydrographer to the East India Company, Gerard greatly enlarged his father's work, issuing many important charts and books on all aspects of geography, navigation, etc. Until the opening of the Dutch Hydrographic Office in the 19th century, the Van Keulen firm issued what were regarded as the official Dutch sea charts. Includes large insets of Havana, Mantancas Bay and Hondo Bay in Cuba. An extraordinary chart.
