**Size:** 6 x 4 inches  
**Price:** SOLD

### Description:

Perhaps the most famous of all miniature maps of California as island. A unique projection, not really following either Sanson or Briggs. Shows a number of place names and an nice charting of the Channel Islands. An essential map to any California as island collection. Maps of California as an island showing less than all of the Continent are rare...this is one of the earliest. From the first German edition of Mallet's remarkable work. McLaughlin 87.
