Description:

Highly detailed map of East and West Florida.

One of the earliest maps to focus on what would become the State of Florida and an excellent example of Florida depicted as an Archipelago, showing Southern Florida as a group of about 50 massive islands and a number of wide navigable water routes from the Gulf to the Atlantic. The map is rich with place names and other early details. One of the most detailed maps of Florida for the period and one of the most curious. Nice full color example of this interesting map.
