**Price:** SOLD

**Description:**

Detailed and decorative map of the Spanish Coast from Andalusia to Murcia and the contiguous North African coastline.

Nice example of this scarce chart of the northwestern Mediterranean, with insets of several major harbors, one of 16 charts in Henri Michelot and Laurent Bremond's ] *Carte Generale dele Mer Mediterranee*, which was published along with their work depicting the ports of the Mediterranean, with an English translation in 1725.

The work is exceptionally detailed and also demonstrates the skill of the engraver, Peter Starckmann, who was then one of the most sought after map engravers of the period.
