### Description:

Interesting map of the United States, depicting quite creatively the Western Territories then in existence on the eve of the Gadsden Purchase, which is not yet shown.

Some of the more interesting place names including Minosota Ter., Jowa, Illineni, Missouri, and the Territori Tuttoara Possesuti Dai Seuvagi (Indian Territory). The western boundaries are also quite interesting.

A scarce map, the first time we have offered it for sale.
