(Madagascar & Indian Ocean -- Untitled Globe Gores)

Stock#: 29189
Map Maker: Endersch
Date: 1751 circa
Place: Elbing
Color: Uncolored
Condition: VG
Size: 17 x 14 inches
Price: SOLD

Description:

Finely engraved sheet of globe gores covering Madagascar and the Indian Ocean, from an unrecorded mid-18th Century Globe.

In August 2012, we were advised of a similar set of gores at the University of Vilnius, engraved by Johann Friedrich Endersch, Royal Geographer to King Augustus III of Poland. Johann Friedrich Endersch (1705-1769) was a famous German cartographer and mathematician. Endersch was born in Dornfeld in Thuringia and had spent most of his life in Elblag in Royal Prussia, Poland. Johann Friedrich Endersch got the title of Royal Mathematician from Augustus III of Poland.

This pair of gores was acquired in a set of 8 (of 12) gores, which when joined would have made a 67cm diameter terrestrial globe. There is no attribution and, to date, it would appear that the gores are from an unrecorded Globe, for which no known complete examples of the globe or gores survive. Based upon information on several of the gores, the publication can be reliably tracked to 1751 or shortly thereafter.

The gores acquired covered (1) Europe up to the Black Sea, (2) 2 sheets covering Africa (with numerous animals and figures of Africans), (3) Asia east of Siam/Indonesia, (4) Australian, (5) New Zealand, (6) 2
