(Southern Africa -- Untitled Globe Gores)

Stock#: 29190
Map Maker: Endersch
Date: 1751 circa
Place: n.p.
Color: Uncolored
Condition: VG
Size: 17 x 14 inches
Price: SOLD

Description:

Finely engraved sheet of globe gores covering the southern part of Africa, from an unrecorded mid-18th Century Globe.

In August 2012, we were advised of a similar set of gores at the University of Vilnius, engraved by Johann Friedrich Endersch, Royal Geographer to King Augustus III of Poland. Johann Friedrich Endersch (1705-1769) was a famous German cartographer and mathematician. Endersch was born in Dornfeld in Thuringia and had spent most of his life in Elblag in Royal Prussia, Poland. Johann Friedrich Endersch got the title of Royal Mathematician from Augustus III of Poland.

Extends south to Tristan da Cunha and Cap Terne Austr., which is probably Bouvet Island.

This pair of gores was acquired in a set of 8 (of 12) gores, which when joined would have made a 67cm diameter terrestrial globe. There is no attribution and, to date, it would appear that the gores are from an unrecorded Globe, for which no known complete examples of the globe or gores survive. Based upon information on several of the gores, the publication can be reliably tracked to 1751 or shortly thereafter.
