Map and Profile of the Colorado River Aqueduct

Stock#: 31205
Map Maker: Anonymous
Date: 1940 circa
Place: Los Angeles
Color: Color
Condition: VG
Size: 19.5 x 9.5 inches
Price: SOLD

Description:

Fine birdseye view style map of Southern California and contiguous parts of Nevada and Arizona, illustrating the Colorado River Aqueduct and its sources.

In the east, Boulder Dam and Parker Dam are shown, along with various tunnels, pump stations and reservoirs, with the origin of the water in the Colorado River. The line of the Aqueduct is then shown winding through a series of channels and tunnel, through the Coachella Valley, over the San Bernardino Mountains and finally to the Inland Empire and Los Angeles Basin, via Lake Mathews.

The map shows several cities around the reservoir at left, while the tunnels, reservoirs, and pumps along the aqueduct are labeled as well. A depiction of the profile of the aqueduct runs along the bottom of the image, while an inset map of the United States in the upper left corner shows the location of the aqueduct.

The map is apparently quite rare. We located only 1 copy (USC), which is the source for our dating of the map.
