## Carte Particuliere de L'Amerique, ou sont exactement Marquees une Partie de la Baye d'Hudson, le Pays des Kilistinons, la Source de la Grande Riviere de Mississipi, les Pays des Illinois, &c.

**Stock#:** 36981dr  
**Map Maker:** Covens & Mortier / Popple  
**Date:** 1740 circa  
**Place:** Amsterdam  
**Color:** Hand Colored  
**Condition:** VG+  
**Size:** 22 x 20.5 inches  
**Price:** SOLD

### Description:

Nice example of the northwestern sheet from the Covens & Mortier's edition of Henry Popple's seminal map of North America.

The map is centered on the course of the Mississippi River, from the Arkansas River to the area north of Lake Winnepeg and Hudson's Bay. The map reaches east to the Appalachians, Lake Erie, Lake Ontario and the Carolina Coast south of Cape Fear and west to the Upper Rio Grande in New Mexico.

The map provides an interesting look at the 5 Great Lakes, only a few years prior to Nicolas Bellin's map of 1744 and 1764, which would significantly redefine the shapes of the lakes.

The map offers a look at the best known topographical detail in the interior, also naming dozens of Indian, French and English settlements in the Mississippi and Ohio River Valleys at a time when these regions were still largely part of a great unknown and unexplored western frontier.

**Carte Particuliere de L'Amerique, ou sont exactement Marquees une Partie de la Baye d'Hudson, le Pays des Kilistinons, la Source de la Grande Riviere de Mississipi, les Pays des Illinois, &c.**

Henry Popple's 20 sheet map of North America is widely regarded as one of the two most famous maps of North America to appear in the 18th Century (along with Johns Mitchell's map). It is widely regarded as a landmark in the mapping of North America, being the first large format English map of North America.

Popple produced the map under the auspices of the Lord Commissioners of Trade and Plantations to help settle disputes arising from the rival expansion of English, French, and Spanish colonies. Increased French exploration and the activities of the fur-traders in the Mississippi valley heightened English fears . . . , since France claimed not only Canada, but also the territories drained by the Mississippi and its tributaries - in practical terms, an area half the continent. England and France disputed for many years the fishing rights off Nova Scotia and the Grand Banks.

Added to these problems was the constant threat of attacks on colonists' settlements by Indians allied to the French, leading to the establishment of several frontier forts in the Ohio valley region.

The map was first issued in 1733 in 20 sheets, plus a key sheet. The only other multiple sheet edition of the map is this example offered by Covens & Mortier, who re-issued the primary map in 4 sheets.
