**The Bahama Banks and Gulf of Florida By Edmund Blunt Hydrographer . . 1833.  
Additions to 1834.**

**Stock#:** 40922ops  
**Map Maker:** Blunt  
**Date:** 1834  
**Place:** New York  
**Color:** Uncolored  
**Condition:** VG-  
**Size:** 49 x 39 inches  
**Price:** SOLD

**Description:**

Rare early state of Blunt's sea chart of Florida and the Bahamas, first published in 1833.

Nice coverage of the Bahama Islands. Has a small inset chart of Key West and twelve small recognition views of coastal approaches.

The Coastline of Florida is still sparsely known and highly inaccurate. Even the general shape of the coastline is far wider than its final form. Over the next 15 years, the results of the United States Coast Survey work in the region would radically reshape the coastline and immediate interior features, as the inland waterways, swamps and lowlands became better understood.

**Detailed Condition:**

Fair condition. Paper and image loss (part of Key West inset) along left edge. Original hand coloring of lighthouses, red and yellow. Not unusual for a working sea chart of the period.
