**Condition:** VG+  
**Size:** 17.5 x 10 inches  
**Price:** SOLD

### Description:

#### *Rare Geological & Mining Map of Northern California & Western Nevada (Virginia City)*

Highly detailed map of Northern California and Western Nevada, colored by Metalurgical regions.

Ten different geological regions are noted.

Guillemin-Tarayre's map is part of a rare set of scientific works published by the French government. The map illustrated a section which relates to geology and mining in California and Nevada. In 1864, as a result of a French military expedition to Mexico, the Commission Scientifique du Mexique was established. At the time, mining in California and Nevada were the focal point of a great deal of interest in Europe.

The map is very rare. This is the first separate example we have ever seen on the market.
