

The Gallapagos Islands Discovered by Capt. John Eaton

Stock#:	47001
Map Maker:	Moll
Date:	
Place:	London
Color:	Hand Colored
Condition:	VG
Size:	12.5 x 8.5 inches
Price:	SOLD

Description:

One of the earliest obtainable maps of the Gallapagos Islands, published 150 years prior to Charles Darwin's visit.

Moll's map is the earliest printed map of the Galapagos Islands.

The map is based upon a manuscript map drawn by William Ambrosia Cowley. Cowley was sailing master of a pirate ship captained by John Eaton in 1684 when they made landfall at the Galapagos Islands in the Pacific Ocean. Cowley's narrative of the voyage entitled Cowley's Voyage Around the Globe was published in the *Collection of Original Voyages* by William Hacke from London in 1699.

In Cowley's manuscript journal he recorded his first observations of the land:

Then we came to an Anchor in a very good Harbour, lying toward the Northernmost end of a fine Island, under the Equinoctial Line: Here being great plenty of Provisions, as Fish, Sea and Land Tortoises, some of which weighed at least 200 Pound weight, which are excellent good Food. Here are also abundance of Fowls, viz. Flemings and Turtle Doves; the latter whereof were so tame, that they would often alight
