### Description:

Attractive full color example of Seutter's map of America, with two spectacular cartouches. A highly detailed and richly engraved map. Seutter's maps are among the most The map is packed with geographic detail, real and apocryphal. The Great Lakes are very unusually shaped. A number of mythical western places are shown. South America is much too wide. The Mississippi is considerably west of its proper course. Many other interesting features. A fine dark impression. Minor repaired tear in the upper left corner, just entering the image and one minor wormhole in the neatline, else a nice example. Normally a \$2800 map. McLaughlin 211.
