<b>Condition:</b>	VG+
<b>Size:</b>	4 x 5 inches
<b>Price:</b>	SOLD

**Description:**

Finely executed miniature map of America, showing California as an Island, published by Pierre du Val.

The map includes a large interesting representation of the Great Lakes, no northwestern coastline for North America, and the Rio Grande (Rio Nort) is flowing into the Gulf of California, rather than the Gulf of Mexico.

Massive Terre De Iesso, extending to California. Curious coastline for New Zealand.
