**Place:** Amsterdam  
**Color:** Hand Colored  
**Condition:** VG  
**Size:** 10 x 7 inches  
**Price:** SOLD

### Description:

#### *Rare Dutch Edition*

Important early map of Florida and the Southeast, illustrating a number of early and important cartographic features.

The present map is the third D'Winter edition of Sanson's important map of the Southeastern United States, published in Amsterdam in 1705, following editions published in Paris and Utrecht.

The projection of the Southeast is improved over Sanson's folio map of 1657. The Florida nomenclature is corrected from Sanson's North America. Most of the rest of the map is Chaves/Ortelius nomenclature. The Southwest is still largely unknown. The first edition of the map was the first map to appear in an atlas which correctly name Lake Erie, although it is pushed 2.5 degrees too far south, increasing the claims of France. Several new rivers appear in Virginia. The Caroline depicted on the map is Ft. Caroline, not the Carolinas.

This is the Amsterdam edition of the map, the only edition to include the title in Dutch. This edition can be identified by the title and the following changes noted in the map: (1) a graticule has been added across the face of the map; (2) 'Lac Grande' is named in Floride Francoise; (3) the boundaries between Canada and Floride, and between Nouveau Mexique and Floride are now shown by a double line; (4) within the map additional mountains and trees are added; (5) the title cartouche has been re-worked slightly; and (6) the lower face now has eyes.
