### Description:

#### *Early Territorial Map of Iowa*

Fine early Territorial map of Iowa at a very early stage of development, still including a part of southern Minnesota.

This interesting map from the *New Universal Atlas*, shows only 31 counties in the eastern half of the state. The remainder of the state is shaded yellow and contains Indian names and a section of the state marked "neutral ground". The map also shows towns and waterways.

One of the earliest obtainable maps of Iowa. Mitchell's pre-1850 maps are becoming increasingly rare and difficult to obtain.

### Detailed Condition:

Several minor spots.
