#### Description:

Nice example of Giacomo Gastaldi's map Northern Europe, Denmark and the Baltic.

Giacomo Gastaldi's Atlas of 1548 has been called the most comprehensive atlas produced between Martin Waldseemüller's *Geographiae* of 1513, and the Abraham Ortelius *Theatrum* of 1570. Gastaldi's maps were beautifully engraved on copper, marking a turning point in the history of cartography. From that point forward, the majority of cartographic works used this medium. As it was a harder material than wood it gave the engraver the ability to render more detail. Gastaldi sought the most up-to-date geographical information available and are among the earliest obtainable maps for regional collectors.
