### Description:

Fascinating Map of Canada and the NW Coast of America, extending south to Neu Albion and Port Drake, and showing the Great Lakes, Upper Mississippi River Valley and the mythical Laryenz See near modern day Wyoming. The NW Coast reflects the discoveries of La Perouse and perhaps Vancouver. Our dating is conjecture, but the map is almost certainly issued prior to 1800. Excellent detail in the Eis Meer (Icy Sea), showing MacKenzie's information. A fascinating and apparently rare German map showing the Northern part of North America.
