A Chart of the Western Ocean By John Seller, Hydrographer to the King

Stock#: 65405
Map Maker: Seller
Date: 1674
Place: London
Color: Hand Colored
Condition: VG
Size: 21 x 17 inches
Price: SOLD

Description:

Second state of Seller's sea chart of the Western Atlantic and the contiguous coasts of New England, Canada, the Eastern Caribbean (from Puerto Rico and the Virginia Islands), Brazil and the Northeast Coast of South America.

The chart is orientated with north to the right, and shows the coast of Labrador, New Foundland and Nova Scotia, the Gulf of St Lawrence and along the coast to Long Island. From there the map covers the Atlantic south to Puerto Rico and the Virgin Islands and along the coast of South America into Brazil to the eastern part, showing Pernambuco (now Recife). The Azores and Cape Verde Islands are on the east side of the chart. Tropicus Cancrini is at the center of the sheet, almost on the fold.

In the top right corner is the Royal arms. The top left includes three scales, and below that is the title shown on an animal hide, supported by two South American natives. Beneath that is the arms of Brazil. In the sea there are two galleons, two sea monsters and two compasses.

Seller's chart is based upon Theunis Jacobsz chart of circa 1650. The most notable additions are the inclusions of the Orinoco River in South America and the Avalon Peninsula in Newfoundland. This first edition was used from 1674 (the date penciled onto the map in the Samuel Pepys copy of Seller's *Atlas Maritimus*) to 1677, when the plate was revised. It may have been issued separately as early as 1672.

The second state of the map adds the names John Colson, William Fisher, James Atkinson and John Thornton to the title.
