**Description:**

Remarkably detailed map of Cuba, with over 100 places named. Includes roads, islands, rivers, mountains, lakes, elevations ,etc. From Vandermaelen's remarkable 6 volume atlas, which if combined as globe gores forms an immense globe. Vandermaelen accomplished the first atlas mapping of the world on a uniform scale. His treatment of the Western US is a landmark in the history the cartography of the Western US, undertaking to map in 20 sheets a region which American publishers were virtually ignoring. A fine unfolded and probably separately issued example of this pair of maps covering the Baja. A bit of soiling, otherwise a near fine example.
