## Haemisphaerium Stellatum Australe Cum Aequali Sphaerarum Proportione

**Stock#:** 67550  
**Map Maker:** Cellarius  
**Date:** 1660  
**Place:** Amsterdam  
**Color:** Hand Colored  
**Condition:** VG  
**Size:** 20 x 17 inches  
**Price:** SOLD

### Description:

Decorative example of this finely executed map of the southwestern sky, illustrating the constellations of the Southwestern Hemisphere superimposed over a southwestern orientation of the Earth, first published by Andreas Cellarius in 1660.

The chart is centered on the ecliptic pole down to about 20 degrees in the northern hemisphere and is presented on a stereographic projection.

The map provides a fantastic image of the stars, as if seen from deeper in space, so that each of the constellations is facing in the opposite direction from the way that the same constellations would be seen from earth. This projection reflects a theory that originated with Petrus Plancius that the stars remained in a sphere-like configuration above the earth and moved in coordination with the earth. This theory is reflected in the title of Cellarius's atlas, *Harmonia Macrocosmica*.

Andreas Cellarius was born in 1596 in Neuhausen and educated in Heidelberg. He emigrated to Holland in the early 17th Century and 1637, moved to Hoorn, where he became the rector of the Latin School. Cellarius' best-known work is his *Harmonia Macrocosmica*, first issued in 1660, by Jan Jansson, as a supplement to Jansson's *Atlas Novus*. The work consists of a series of Celestial Charts begun by Cellarius in 1647 and intended as part of a two-volume treatise on cosmography, which was never issued.

Cellarius' charts are the most sought after of celestial charts, blending the striking imagery of the golden age of Dutch Cartography with contemporary scientific knowledge. The present examples come from the

**Haemisphaerium Stellatum Australe Cum Aequali Sphaerarum Proportione**

Valk & Schenk edition of Cellarius' atlas, which is unchanged from the 1661 edition. The 1660 and 1661 editions can be distinguished by the inclusion of a plate number in the lower right corner of the 1661 edition. The Valk & Schenk edition can be distinguished by the addition of the printer's name (Valk & Schenk) in the titles of the maps.
