[Apollo 10] Command and Service Module over the lunar surface.

Stock#: 69071
Map Maker:
Date: 1969
Place: n.p.
Color: Color
Condition: Good
Size: 10 x 8 inches
Price: SOLD

Description:

Attractive 8x10 "red letter" photograph of the Command and Service Modules taken from the Lunar Module, after the separation of the modules in lunar orbit.

The official NASA copy for the photo reads:

AS10-27-3873 (22 May 1969) --- The Apollo 10 Command and Service Modules (CSM) are photographed from the Lunar Module (LM) after CSM/LM separation in lunar orbit. The CSM was about 175 statute miles east of Smyth's Sea and was above the rough terrain which is typical of the lunar farside. The eastward oblique view of the lunar surface is centered near 105 degrees east longitude and 1 degree north latitude. The horizon is approximately 600 kilometers (374 statute miles) away. Numerous bright craters and the absence of shadows show that the sun was almost directly overhead when this photograph was taken.

Detailed Condition:

"Apollo 10" written in the upper blank margin in sharpie.
