Map Maker: Zurner / Weigel

Date: 1739 circaPlace: NurembergColor: Hand Colored

Condition: VG

Size: 7.5×5 inches

Price: SOLD

Description:

Competing Visions of the Solar System

Finely-colored example of Zurner's illustration of Brahe's and Copernicus' models of the solar system.

The two circular diagrams both illustrate heliocentric hypotheses. However, Brahe's shows the planets orbiting the sun, with the sun and moon then orbiting the Earth. Copernicus' model is more familiar, yet it still has the orbits in a circular, rather than an elliptical, shape.

Separating the two models are illustrations of a solar and lunar eclipse.
