Description:

The Coffee All of France Is Drinking (Toute la France Boit)

Rare Coffee Atlas of the World, published by Le Cafe Jihair and printed by Ateliers Bondel La Rougery.

The atlas consists of 24 regional maps and 1 world map. The World map provides an over view of the coffee consumption for 41 countries of the world in 1929-1930. The 24 color maps show the coffee producing countries of the world (some include more than 1 country), primarily in Africa, Asia, Arabia, South America, Central America, Mexico, the Caribbean and South Pacific.

Each map is printed individually as a single sheet, with the whole tied together and bound illustrated. It is likely that the individual maps were given away separately, although we have been unable to locate any bibliographic references.

Rarity

This is the first time we have ever seen the atlas and we have never seen the individual maps.

OCLC locates 4 copies, Bibliotheque National de France, University Bibliothek, Johann Christian Seenckenberg and ZBW Deutsche Zentralbibliothek

Detailed Condition:

Printed cover plus title page, 24 regional and 1 world map, table of contents.
