### Description:

Beautiful vintage color bird's-eye view of Heidelberg and the region surrounding it.

The view is characteristic of the tourist promotional material that was being created for the Alps and Germany at this time, with a flourishing cottage industry of bird's-eye painters documenting practically every mountain and valley from southern Germany to northern Italy.

We have previously had one view by the artist of this piece, G. Ruep. The other item was also a German view.

### Detailed Condition:

Folding map with some minor wear at folds.
