### Description:

First regional map of America to show California as an Island. Prior to this map, all maps with California shown as an Island were either World maps, Western Hemisphere, North America, Pacific Ocean or some substantially larger geographical region. The region illustrated was still largely unknown. First map to show 2nd Sanson Model of insular California (two bays shown in Northernmost portion of the island). Nomenclature is a combination of Blaeu and Sanson. New Indian tribes named along the Rio Grande. The peninsula above California is a curious and unexplained addition. A seminal map, which influenced California Cartography for the next 50 years. A cornerstone map for California collectors. Burden 327; Leighley 9; McLaughlin 16; Tooley p.116. This is the 3rd state of the map, which McLaughlin was not able to date but which we date as being from the 1662 edition of Sanson's *L'Amerique en Plusieurs Cartes Nouvelles...* the third atlas to focus solely upon America.
