Fine Original Color Example

Nice example of Lewis Evans' highly important map of the Middle British Colonies, at the start of the American Revolution.

This edition of the map was prepared specifically for the American Military Pocket Atlas, an atlas published for use by British Military Officers during the American Revolution in a size which would fit into the saddlebags of a mounted British Officer. However, it seems that this example is in a deluxe full original color.

Along with John Mitchell's map of North America, the Evans map is considered the most important American map of the 18th Century. Both maps were intended to spur western expansion into the Trans-Allegheny, Ohio Valley and regions westward and in response to French encroachments. Evans' map became the standard for nearly 50 years, being re-issued in this and other pirated editions by Jefferys, Bowles, Kitchen and others.

cartographic importance of the map and its place in the history of cartography are substantial. An essay on this map is available by emailing us a request.

The detail on this map is extensive, and the notes are fascinating. The dense settlements of the coast give way to the various mountain ranges of the Appalachian to the west. Notes relate to treaties made with Native American tribes, the passability of mountain ranges, or anything else that might be of use to an explorer or mounted officer.

Includes an inset map of the northern midwest to Lake Superior, labeled as the "upper parts of Canada."

This example is from Jeffery's *American Military Pocket Atlas*, otherwise known as the *Holster Atlas*, having been carried into battle by British Officers. Because of its use as a primary battlefield source, it is among the most interesting and historically important of the later editions of Evans' map.
