### Description:

#### *A Decade Before Darwin's Arrival*

Highly detailed map of the Galapagos Islands, one of the few large format maps to treat the islands with any detail--let alone a complete large format map.

The map shows the islands less than a decade before the visit of Charles Darwin aboard the 'Beagle'.

From Vandermaelen's remarkable 6 volume atlas, which if combined as globe gores forms an immense globe. Vandermaelen accomplished the first atlas mapping of the world on a uniform scale.
