Description:

Finely colored example of Munster's France, based upon the work of Claudius Ptolemy.

Shows a remarkable depiction of the region, as known in Ptolemy's time. Munster's *Geographia* (1st issued in 1540) and *Cosmographia* (1548) are the most important and widely copied geographical works of the middle part of the 16th Century and represented for most Europeans the first accessible imagery (maps and views) of the World.
