Description:

Picquet's revised edition of Brue's classical map of the Southwest is a fascinating study in up to date and out of date cartographic information. The map clearly shows a post-Gadsden purchase boundary between Mexico and US, yet retains much of the pre-Fremont cartographic details of the earlier states of the map, including the mythical California Rivers and massive Tule and Tulare lakes. Massive Missouri Territory still appears, apparently unchanged from the 1830s. The treatment of the Rocky Mountains is curious--not a single Cordillera configuration, but also clearly not contemporary. A nice wide margined example.
