Description:

Detailed map of the area centered on Serbia, published in France and sold by Edward Stanford in London.

In the second half of 19th century, Serbia gained statehood as the Kingdom of Serbia. It thus became part of the constellation of European states and the first political parties were founded, thus giving new momentum to political life.

The May Coup in 1903, bringing Đorđe Petrović - Karađorđe's grandson to the throne with the title of King Peter I, opened the way for parliamentary democracy in Serbia. Having received a European education, this liberal king translated "On Liberty" by John Stuart Mill and gave his country a democratic constitution. It initiated a period of parliamentary government and political freedom interrupted by the outbreak of the liberation wars.
