**[Map of the Mount Everest Region] Mahalangur Himal Chomolongma -- Mount Everest**

**Stock#:** 95259  
**Map Maker:** Schneider  
**Date:** 1957  
**Place:** Berlin  
**Color:** Color  
**Condition:** VG  
**Size:** 39.5 x 31.25 inches  
**Price:** \$ 1,800.00

**Description:**

**"A Masterpiece of Reconnaissance Surveying" -- The First Modern Map of The Mount Everest Region**

Fine example of the first map to show the entire Mount Everest-Khumbu region at such large scale.

The present map is of monumental importance. As noted in Volume 6 of the *History of Cartography* at page 595.

*The first ascent of Mount Everest by Sir Edmund Hillary and Tenzing Norgay on 29 May 1953 stimulated interest in large-scale topographic mapping of the region. The 1:25,000-scale map, Mahalangur Himal: Chomolongma-Mount Everest, edited by the DAV, ÖAV, and Deutsche Forschungsgemeinschaft, was published in 1957. It was the first map to show the entire Mount Everest-Khumbu region at such large scale. The fieldwork (triangulation and terrestrial photogrammetry) during the International Himalaya Expedition 1955 and subsequent analysis was conducted by Schneider. Relief representation consisted of twenty-meter contours with rock drawing by Ebster.*

During the 1955 International Himalaya Expedition, let my Norman Dyhernfurth, Erwin Schneider conducted terrestrial photogrammetric fieldwork and subsequently plotted his remarkable 1957 Chomolongma-Mount Everest map. This map produced at a scale of 1:25,000 uses for control the latest

**[Map of the Mount Everest Region] Mahalangur Himal Chomolongma -- Mount Everest**

position and height of Everest, as determined by the Survey of India (1952-55) and fixed at 29,028 feet. The map is a masterpiece of reconnaissance surveying. The detail made possible by Schneider's careful ground survey and the artistry of Fritz Ebster, who turned field sketches into the relief-like reproduction of bedrock, moraines, and glaciers, is commendable.

Schneider's career as a mapmaker in the region would last for another 20 years. Until 1977, the preparation of those maps was the responsibility of Schneider, who organized and executed the fieldwork (triangulation, terrestrial photogrammetry, and aerial imagery), as well as the analysis.

**Detailed Condition:**

Folding map. Minor wear and small losses at folds.
