### Description:

Nice example (bound in plano) of this finely engraved 18th-century English World atlas, being the 1761 edition of Dury's *New General and Universal Atlas*.

Rumsey (3004) says that the map of Canada is double-page in the 1763 edition but not in the 1761. The 1763 having been changed to reflect the conclusion of the French and Indian War and the Treaty of that year. Perhaps this is an intermediate edition between the 1761 examined by Rumsey and the 1763 that is his number 3004.

Includes an engraved dedication to William Petty Earl and Baron of Shelburn.

"Sea of Corea" is labeled on the general map of Asia.

### List of maps:
