Description:

Interesting chart illustrating the comparative lengths of rivers, grouped by continent, from Finley's *New General Atlas*.

By today's standard, the chart has many inaccuracies. In Europe, the Ural River is not listed. Neither the Congo, Zambezi, nor Niger are included as among Africa's longest rivers. The Nile is listed with a length of 2,000 miles. In South America, the Rio de la Plata is listed as a 2,150-mile-long river. North America list does not have the Mackenzie or Yukon Rivers.
