Date: 1832
Place: Paris
Color: Hand Colored
Condition: VG
Size: 20 x 14 inches
Price: SOLD

Description:

Fine example of this attractive and detailed map of the United States & Canada, extending nearly to the Rocky Mountains.

Texas is shown as part of Mexico, shortly before it declared its independence in 1836. The region west of the Missouri River is dominated by the Mandan, Osage and Ozark Districts, with a small region called Territoire Des Indiens Du Nord Du Mexique.

In the midwest, the future Iowa Territory is "District des Sioux," which extends to Canada. Oversized Nord-Oest Territory is shown, wich will soon become Terr. de Norde-Ouest ou Ouisconsin" in the next state of the map.

The map delineates a number of other Indian Regions in Georgia, Alabama, Misssissippi, and other parts. Many forts and Indian Tribes located, along with roads.

Insets of Florida and Newfoundland. Several interesting annotations in the body of the map. The legend describes Liberia as being a US Colony. The note at the bottom left translates as follows:

This second edition is an extract from our map of these regions, published in 1832, on a very large sheet recently revised and enlarged! To give, here, as much scope as possible to the best known and most populated Regions, we have omitted, to the West, part of the Mandan District

*and that of Oregon, for which we must consult our general map of North America, No. 57,
from our Universal Atlas.*

*The numbers written inside this map express the absolute elevation, in toises, of principal
points above the level of the Ocean.*

First issued in 1832, the map would be reissued, dated 1836 and 1843.
